

An Invitation to Become a Patron

From Wildfires to Regeneration

Not because you can.

*Because you are in a position to make a lasting difference —
precisely now, when it matters most.*

A Different Kind of Legacy

Throughout history, the most enduring acts of philanthropy have not simply funded projects.

They have enabled ideas at critical moments that protected communities and created opportunities which continued to benefit generations long after the original investment was made.

The From Wildfires to Regeneration Framework represents such an opportunity.

Its purpose is not simply to respond to wildfires, but to establish a practical, integrated model for protecting vulnerable landscapes, strengthening environmental resilience and supporting long-term ecological regeneration.

This is a Framework designed to evolve over decades rather than years.

Its success depends upon the vision of those who recognise that some of society's most important challenges cannot be solved through public funding alone. They require individuals, families, foundations and organisations willing to invest in solutions whose value extends far beyond the present moment.

Protect and Regenerate Salento

Fund an integrated operational capability for wildfire prevention, early detection and rapid response — helping to protect and regenerate Salento.

- Thermal surveillance drone
- Fixed thermal detection point
- First-response kit
- Operational equipment for first response

COVERAGE

≈ 50 km²

INITIAL PATRONAGE

≈ €62,000*

ANNUAL SUPPORT

≈ €6,000*/year

(≈ €500/month, equipment maintenance included)

Early Detection Node

- Professional drone with thermal camera
- Integrated operational communications
- Charging station

COVERAGE

≈ 50 km²

INITIAL PATRONAGE

≈ €30,000*

ANNUAL SUPPORT

≈ €6,000*/year

(≈ €500/month)

Fixed Detection Station

- Professional thermal camera
- AI-assisted monitoring
- Dedicated operational link

COVERAGE

High-risk strategic area

INITIAL PATRONAGE

≈ €22,000*

ANNUAL SUPPORT

≈ €1,200*/year

First-Response Kit

- Trailer with 500–600 litre water tank
- Pumping system and hoses
- First-response operational equipment
- Operational communications

INITIAL PATRONAGE

≈ €10,000*

ANNUAL SUPPORT

≈ €750*/year

Observation Post

- Elevated observation point with accommodation
- Operational link
- Solar power
- Drone operational capability

INITIAL PATRONAGE

≈ €120,000*

ANNUAL SUPPORT

≈ €5,000*/year

Operational Coordination

Operational coordination is what turns equipment, people and resources into a genuine capability for action. Without it, none of the elements described above can be implemented, coordinated or sustained over time.

A Patron does far more than fund equipment or individual projects. A Patron helps ensure that properly trained local people are in place precisely when the territory needs them most. In periods of lower fire risk, those same people turn from protecting the landscape to regenerating it — restoring ecosystems, strengthening environmental resilience, and building a lasting model of responsible land stewardship for future generations.

Programme Coordination — Full-time	≈ €3,300*/month
Operations Management — Part-time / Consultancy	≈ €1,700*/month
Logistics & Operations Coordination — Part-time	≈ €1,500*/month
Volunteer Coordination — Part-time (expanding progressively as needed)	≈ €1,500*/month
Administrative Support — As needed	≈ €700*/month
Full Operational Coordination	≈ €8,700*/month

LEGACY RECOGNITION

Every operational capability funded — from thermal surveillance drones and first-response units to observation posts and regeneration projects — may be dedicated in your name, in the name of your family or foundation, or in honour of a person of your choosing.

Your example may encourage other Patrons — families, foundations, family offices and philanthropic organisations — to support the protection and regeneration of Salento, extending its impact over time.

*Imagine children growing up in Salento, coming to know the
vision and generosity of those who chose to act when it
mattered most — protecting and regenerating the landscape
they have the privilege of calling home.*

*Some opportunities are defined by the scale of the investment
they require.*

*Others are defined by the significance of the moment in which
they arise.*
